

## IMPORTANT NOTICE TO WILLISTON RESIDENTS

Because of the Coronavirus (COVID-19) pandemic, Federal and State Declarations of Emergency have been issued that recommend non-essential employees shelter in place when possible and promote social distancing. As a result, Waste Management, who picks up household garbage and yard trash for the Town of Williston, has significantly reduced its “field” work and is focusing on the performance of essential services during this emergency.

Because of its importance to the health and safety of our society, municipal solid waste collection and disposal is deemed an “essential service” in most instances. However, the collection and disposal of yard waste is not. Therefore, effective Monday, March 30, 2020, Waste Management is postponing the pickup of the following during this period of emergency:

Yard Waste Collection-grass clippings, brush, tree limbs, etc.

Any waste stream outside of the roll cart

When the Declaration of Emergency and social distancing recommendations have been eased and Waste Management’s work force returns to pre-pandemic levels, these services will be reinstated.
